DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 2-3, 4-6, 7, 7-10, and 11-17 are drawn to a semiconductor device, classified in class 257, subclass 414.
- II. Claims 18-22 and 23-24 are drawn to method of manufacturing a semiconductor device, classified in class 438, subclass 48.

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case that the process as claimed in claim 18 can be used to make other and materially different product. For example, instead of bonding a side of the member having the semiconductor layer, the semiconductor layer can have a pre-formed member so that the bonding step is eliminated.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 2823

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
